

“By using the tablets, I’ve learned how to do maths on my own. My marks have improved and I’ve watched videos on grammar, spelling and verbs.”

Assadek

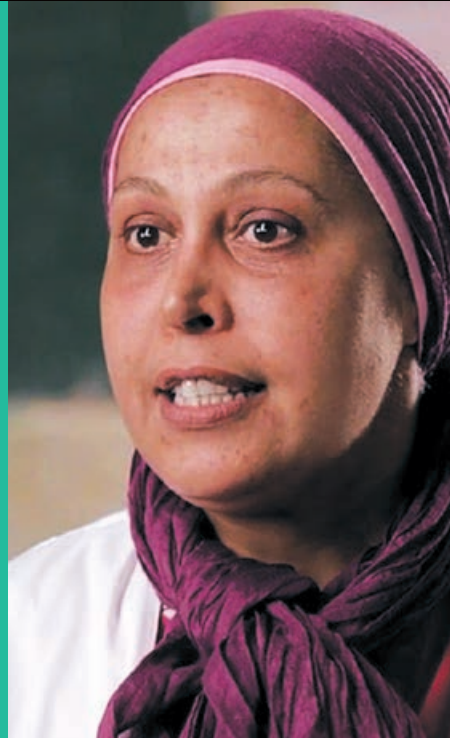

A pupil in Niger

Perspectives

“The tablet is a truly a cultural resource for us. It enables both teachers and students to access educational content, and is a powerful educational tool. We even use it to teach pupils how to write.”

Lamia Sakli

Head teacher, Tunisia

Foundation

Supporting education for the poorest

Why?

Some children have no access to books or the internet. Digital Schools are mobile electronic libraries providing educational content to under-resourced schools.

With who?

With an educational mediator in each country, the Orange Foundation and the ministries concerned validate the pedagogical content and choose the schools that participate in the program. The Foundation supports the teachers who use the digital educational kits. An Orange volunteer is nominated for each school.

Digital Schools

Offering children access to education for truly equal opportunities.
